

ZOO/AQUARIUM GENERAL HEALTH and DIET HISTORY FORM

Facility name: _____

Contact Information

Last name: _____

Email: _____

Primary veterinarian name (if different from above):

Animal Information

Species: _____ **Number of animals housed together:** _____

If applicable, please provide the following detailed information:

[illegible]

Previous 3 body weights measured with corresponding dates, if available.

*Note: If a more weight record is available, please feel free to attach it in an email to the team at info@ardentevetnutrition.com.

House Name	Body Weight	Date Body Weight Obtained

House Name	Fecal Quality - Consistency (please describe)	Fecal Quality - Frequency (please describe)

If applicable, please provide the following information as to reproductive status:

Animal ID	Chemical Birth Control (Y/N)	Reproductively Active (Y/N)

Are any of the animals currently being treated for any condition(s) or disease(s)?

☐ Yes

☐ No

If yes, please list animal ID, diagnosed condition/disease, approximate date of diagnosis, medications.

Animal ID	Condition/Disease	Date Diagnosed	Medication Name, Dose, Route, Freq., Length

Exhibit Information

Tank Type:

- ☐ Closed filtration tank system
☐ Open, flow-through system
☐ Combination system

Exhibit location:

- ☐ Indoor only
☐ Outdoor only
☐ Both

If any part of the exhibit is located outside, is there shade provided?

- ☐ Yes, total
☐ Yes, partial
☐ None

Diet And Enrichment Information

How are the fish/invertebrates fed? Check all that apply:

- ☐ General broadcast feed ☐ Target/pole-fed ☐ Combination of both methods

Instructions for the following questions:

- For each food item, the "Offered Amount (by weight)" must be a measured amount using a scale with units in grams. Input the TOTAL weight (grams) of the ingredient fed daily.
- For each food item, the "Consumed Amount (estimated %)" should describe the amount of offered food item the animal consumed. This can be represented as an estimated % consumed, out of 100% (or complete consumption).

Possible scenarios to troubleshoot:

- Unlabeled cup or scoop: First measure the amount held in that cup/scoop - for example, "½ scoop" may actually represent a true 1 cup, as measured. Then weigh the volume of diet item held within that container.
- Abstract unit of measure (e.g. "one handful"), take one handful of the item and obtain the gram weight of that handful 5 days in a row. If different individuals are doing the feeding, make sure that each individual's handful is represented. Then calculate the average weight (grams) per handful by summing the gram weights from each of the 5 days, and dividing by 5. Provide that average weight as the "Amount" below.

Commercial Feeds

Describe all brands, product names, amounts, and frequency for ALL commercial foods offered as a part of regular diet.

Manufacturer	Product Name	Form	Offered Amount (by weight, grams)	Frequency	Consumed Amount (estimated %)

Whole Food Items

List all other food items offered as a part of regular diet, including whole prey and produce.

Please provide information on how the food items are prepared (whole vs. chopped vs. steaks vs. filleted, live vs. frozen/thawed, shell on or off, head and tail on or off, etc.):

Food Item	Preparation	Offered Amount (by weight, grams)	Freq per day	Consumed Amount (estimated %)	Days per week

Please provide information on how food items are prepared (*whole vs. chopped, cooked vs. raw, live vs. frozen/thawed, etc.)

Other Food Items

List other food items offered for enrichment purposes (e.g., training, enrichment, educational programs, etc.).

Food Item	Preparation	Offered Amount (by weight, grams)	Frequency	Consumed Amount (estimated %)	Months Offered

Are there any seasonal variations to the diet provided (aside from enrichment items offered)? If so, please thoroughly describe:

In the last 5 years, have you ever had a nutrient analysis performed by a laboratory on either the whole diet and/or any individual food items (e.g. hay, browse, leafy greens, etc.)?

☐ Yes (If yes, please provide copies of analyses.) ☐ No

Are there any food items that the animal particularly prefers? Please describe:

Are there any food items that the animal does not particularly like and/or refuses? Please describe:

Have you made any changes to the diet offered in the last 4 weeks?

☐ Yes ☐ No

If so, please describe the change made:

Are any dietary supplements (vitamins, fatty acids, oils, etc.) given?

☐ Yes ☐ No

If yes, please describe brand/type, quantity, frequency:

[illegible]
